

Converge

Multi-channel Payment Gateway

Converge is a multi-channel payment gateway capable of handling a diverse set of gateway roles, depending on your needs, Internet – Mobile – Call Center – Branch. Some of these gateway roles include:

- Switching Server
- Messaging Server
- Connectivity Server
- Interface Service
- Account Alias & Management Service
- Transaction Monitoring, Security, Report Service
- Application Service
- Merchant Management Service

In emerging today business where cost efficiency and customer are at heart of operating business, Internet and mobile phone serve as the most efficient service channels as customer lifestyle has dramatically changed.

Convergence is the key. We need a gateway to connect our services with customers through these channels. Converge is a gateway that seamlessly integrates into existing infrastructure and systems. A gateway that enables all service channels to co-operate efficiently.

Built for the Web

Converge gives you the ability to deliver rich web-based experience efficiently and effectively, with improved connectivity, end-to-end security and lower infrastructure costs.

Built for Mobile Phone

Converge Mobile Gateway capable of handling connectivity with multiple mobile operators and promoting a single user experience throughout different operators.

High Security

Converge is a highly secure gateway with security innovations including VISA Account Information Security, Account Alias System, providing unprecedented levels of protection for your business.

Service Channel Convergence

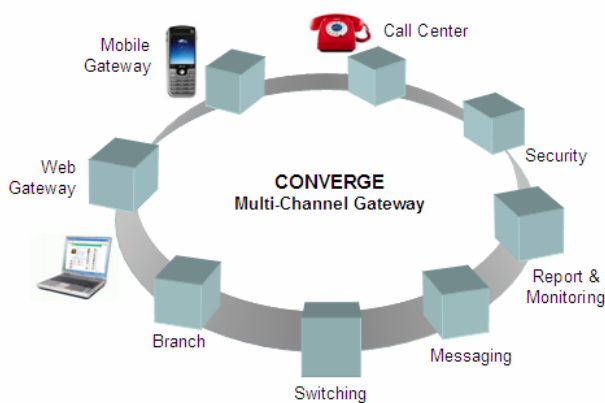

Converge enables multi-service channel and converges them efficiently. Services such as registration, transaction process, information enquiry, and customer service are available throughout Internet, mobile phone, call center, and branch. By converging channels, we are able to roll out services throughout available channels with similar user experience. This also eases processes of marketing communication and customer service.

Connectivity

Converge comes with Internet and Mobile Gateway Services and supports XML, Web Service, ISO8583 interfaces for core banking, legacy system, applications, merchants, and business partners. It connects the gateway with Internet and multiple mobile operators and enables single user experience throughout different mobile operators and phone models.

Security

Converge employs financial security standard certified by VISA International, Krung Thai Bank Public Company Limited, and guidance from Bank of Thailand. The gateway is reviewed and certified annually by VISA. We employ Digital Signature, SSL, 2-factor authentication, Intrusion Detection System, Encryption as used with ATM pin, and online identity protection using Account Alias System.

Converge is a VISA certified Internet and Mobile payment gateway
